Professional Summary

Results-driven Software Engineer with nearly a year of direct professional experience delivering high-performance custom web and application solutions across the full SDLC. Proficient in C#, ASP.NET Core, Angular, and React, with a strong foundation in SQL Server, Clean Architecture, and SOLID principles. Backed by an intensive Professional IT Diploma and hands-on expertise in building scalable enterprise-grade systems, I take accountability for projects from conception to deployment in fast-paced, Agile environments.

Technical Skills

- **Languages:** C#, Java, JavaScript, TypeScript, HTML/CSS.
- **Frameworks & APIs:** ASP.NET Core MVC/Web API, SOAP API, Angular, React, Android, jQuery.
- **Databases:** MS SQL Server (Queries, Stored Procedures, Views), EF Core.
- **Reporting Tools:** Crystal Reports.
- **Architecture:** RESTful API, Clean Architecture, CQRS, SOLID, OOP.
- **Security:** ASP.NET Core Identity, JWT Authentication.
- **Tools & Process:** Git, GitHub, Postman, Swagger, Agile/Scrum, SDLC.

Projects

LedgerAI - Financial & Inventory Management System

<https://github.com/samiul-bd/LedgerAi>

GitHub:

Technologies: ASP.NET Core Web API, C#, EF Core, SQL Server, React.js, TypeScript, Bootstrap, JWT

Contribution:

- Architected an enterprise-grade full-stack accounting application featuring Chart of Accounts, Journal Entries, and Store Ledger modules.
- Engineered strict double-entry accounting validations and utilized EF Core asynchronous transactions to ensure data integrity.
- Maintained application performance and security standards by integrating ASP.NET Core Identity with JWT for robust API security.
- Developed a dynamic, responsive user interface using React, handling complex state management for multi-line transaction forms.

Naogaar Aam - E-commerce & ERP System

<https://github.com/samiul-bd/NaogarAam>

GitHub:

Technologies: ASP.NET Core, C#, EF Core, SQL Server, Angular, MediatR (CQRS), TypeScript

Contribution:

- Architected a full-stack modular monolith integrating Sales, Inventory, and Financial modules using Clean Architecture and CQRS patterns.
- Developed a high-performance Single Page Application (SPA) using Angular, collaborating on technical design and architecture decisions.
- Implemented strict data integrity utilizing the Unit of Work pattern, EF Core asynchronous transactions, and global audit trails.
- Wrote optimized queries and handled geo-location data pipelines to analyze ad ROI and cart abandonment.
